

Environmental Case Study

Measuring Sustainability and Ecological Footprints

1. What do we depend on nature for?
2. What does it mean to live sustainably?
3. What is an environmental footprint assessment based on?
4. According to redefining progress, what is the average citizen ecological footprint?
5. Which group of people has:
 - a. The smallest ecological footprint?
 - b. The highest ecological footprint?
6. Which 3 things could reduce our environmental footprint?
